EXPERIENCE

Freelancing

January 2023 – Present

Self-Employed

- Design and develop responsive web applications across e-commerce, ERP, and SaaS domains using multiple tech stacks.
- Build secure and scalable backend systems and APIs, integrate third-party services, and optimize database queries.
- Improve client websites' performance by implementing caching strategies, code optimization, and database tuning, reducing load times by up to **43%**.
- Customize and deploy applications on cloud platforms (**AWS**, **GCP**, **DigitalOcean**), ensuring high availability and reliability.
- Collaborate with clients to gather requirements, propose solutions, and deliver fully functional products within deadlines.
- Implement authentication, role-based access control, and data encryption to enhance application security.
- Develop e-commerce and billing solutions, integrating payment gateways like Stripe and PayPal.
- Maintain and refactor legacy codebases, increasing maintainability and scalability for long-term projects.
- Manage project lifecycle independently, from planning and prototyping to deployment and post-launch support.
- Consistently receive positive client feedback, resulting in repeat contracts and referrals.

Software Engineer – Full-Stack

July 2020 – September 2022

AppBox

London, United Kingdom - Remote

- Developed APIs using **Go** and **PostgreSQL** to manage user data.
- Implemented authentication system and **OAuth** for Google, AppleID, Facebook and GoCardless.
- Implemented payments and billing API using Stripe and GoCardless.
- Developed full-stack applications using **Go**, **NodeJS**, **Vue**, **React**, **PostgreSQL**, **Redis** and **Firebase** for multiple projects.
- Managed servers and deployments using **Docker** and **DigitalOcean**.

PROJECTS

Fawatir (ERP & CMS Platform)

July 2024 – Present

- Leading the end-to-end development of Fawatir, an ERP & CMS platform for billing, client management, and warehouse operations
- Build a scalable backend in **Go**, leveraging **gRPC** for efficient service-to-service communication.
- Design and develop responsive, high-performance UIs with **SolidJS**, ensuring a seamless user experience.
- Architect and deploy the system using **Docker** and **Kubernetes**, achieving scalability, resilience, and simplified deployment.
- Engineer robust data models in **PostgreSQL**, with **Redis** caching to enhance query performance and reduce system latency.
- Design the platform around a modular **microservices architecture**, enabling easier maintenance and feature expansion.
- Automate deployment workflows with **CI/CD** pipelines, reducing release cycles and ensuring reliable updates.
- Work directly with clients to align technical solutions with business requirements, delivering a production-ready enterprise platform.

EDUCATION

Mansoura University

October 2022 – Expected June 2027

BEng. in Communications and Computer Engineering.

Mansoura, Egypt

TECHNICAL SKILLS

Core Skills: Go, Python, JavaScript, SQL (PostgreSQL, MariaDB/MySQL), C, Zig, Lua, Bash, SolidJS, Svelte, Vue, Tailwind CSS.

Additional Skills: Rust, C++, C#, Java, Spring Boot, PHP, Laravel, Django, Flask, FastAPI, React.

Developer Tools: Linux, Git, Docker, Kubernetes, Amazon Web Services (AWS), Google Cloud Platform (GCP), DigitalOcean.
